

Local Anaesthesia

PFC Ltd is equipped and staffed for minor surgical procedures under local anesthetic.

We can numb the whole or part of the foot.

If your problem is extremely painful please let us know if you would prefer a local anaesthetic.

However please consider the following:

1. You are strongly advised not to drive, so you will need a lift.
2. The injection to numb your foot, is not pain free. Treatment without anaesthetic may be less than that to numb your foot.
3. Certain medical conditions or medications may prohibit the use of anaesthetic.
4. Your treatment will be slightly more expensive.
